SUMMARY

Computer Science graduate (2026) with hands-on experience in Python programming and AI/ML model development. Developed a crop yield prediction system with fertilizer recommendation, achieving 93.7% accuracy using Decision Trees, Random Forest, and Support Vector Machine (SVM) algorithms. Currently upskilling in Python Full-Stack Web Development and AI/ML to build scalable, intelligent, and user-friendly applications. Seeking entry-level software opportunities to apply my skills, learn continuously, and contribute to innovative projects.

TECHNICAL SKILLS

Programming Languages: Python

Web Development: HTML5, CSS3, JavaScript, ReactJS

Frameworks / Tools: Django, Git, GitHub

Database: MySQL

Machine Learning: Decision Trees, Random Forest, SVM

Core Concepts: DSA, DBMS, Agile

EDUCATION

Ramireddy Subiramireddy Engineering College (RSREC)

Apr 2026

B.Tech – Computer Science and Engineering (CSE)

CGPA: 8.06

Sai Cooperative Junior College

Intermediate (MPC)

80.1% — 2020–2022

St. Joseph EM High School

SSC

95.67% — 2019–2020

INTERNSHIPS

Full Stack Intern

Dec 2025 – Apr 2026

SkillDzire

- Built full-stack web applications using Java, Spring Boot, and MySQL; designed RESTful APIs for business workflows.
- Worked in Linux-based environments for deployment and debugging; used Git/GitHub for version control.

AI/ML Product Engineer Intern

May 2024 – Oct 2024

YBI Foundation

- Developed Python-based ML models integrated into a Flask web application deployed on cloud infrastructure.
- Participated in Agile sprints, delivering features on schedule and supporting team debugging efforts.

PROJECTS

Deepfake Detection System | *Python, Flask, CNN, TensorFlow, OpenCV*

- Built a CNN-based detection system achieving 92% accuracy, deployed via Flask on a cloud server.
- Used OpenCV for real-time video frame analysis with optimized scripting, reducing detection latency by 30%.
- Integrated REST API endpoints to allow external systems to query detection results programmatically.

Crop Yield Prediction System | *Python, Streamlit, Scikit-learn*

- Built an ML model that achieved 93.7% accuracy using Decision Trees, Random Forest, and SVM; handled data preprocessing with Pandas and Matplotlib.
- Deployed an interactive Streamlit dashboard for visualizing predictions, suitable fertilization, and input feature analysis.

Personal Portfolio Website | *HTML, CSS, JavaScript*

- Designed and deployed a responsive portfolio on GitHub Pages.
- Implemented clean UI layout with cross-browser compatibility and mobile-responsive design.

CERTIFICATIONS

- Python for Data Science and Machine Learning – Udemy
- Machine Learning with Python & Web Development – IBM
- AI-First Software Engineering – Infosys Springboard
- Digital Image Processing – NPTEL

KEY STRENGTHS

- Solved some coding problems on coding platforms, strengthening logical thinking and problem-solving skills.
- Quick to learn new technologies and apply them to build practical, working solutions.

SOFT SKILLS

- Problem Solving
- Teamwork
- Communication
- Adaptability
- Time Management
